Peter Ochieng

Software Engineer

Kenya | Email: add your email here | GitHub: add your link here

Profile

Computer Science and Management Information Systems student at Kibabii University. I build web systems and Android apps end to end, with a focus on Kenyan use cases such as M-Pesa payments and student services. Seeking full-stack engineering roles and freelance or remote development work.

Skills

Frontend: React, JavaScript, HTML & CSS, Tailwind CSS
Backend: Node.js, Express, PHP, REST APIs, session-based authentication
Mobile: Kotlin, Jetpack Compose, Material 3, Firebase
Data: MySQL, MySQLi, Firebase Realtime Database
Payments & APIs: M-Pesa Daraja (STK Push), Africa's Talking SMS
Tooling: Git & GitHub, GitHub Actions, PM2, VPS deployment

Projects

AutoBill Kenya **(React, Node.js, Express, MySQL, M-Pesa Daraja)**
Billing and WiFi hotspot management system with a customer hotspot portal and admin side; payments through M-Pesa STK Push.

CampusVoice **(PHP, MySQLi, JavaScript, CSS)**
Student complaint platform with registration, session-based login, password recovery and a student dashboard.

MySaver **(Kotlin, Jetpack Compose, Material 3)**
WhatsApp Status saver for Android 7 to 15 using the Storage Access Framework and MediaStore.

Car Rental App **(Kotlin, Firebase Authentication, Realtime Database)**
Android car rental app with user accounts and live booking data.

Tiriki Online Grocery (proposal) **(System design, M-Pesa Daraja, Africa's Talking)**
15-page proposal for a Kenya-based grocery delivery platform covering Data Protection Act 2019 compliance, a 12-month agile plan and a costed budget.

Education

Computer Science & Management Information Systems — Kibabii University, Kenya
Coursework: MIS (CSC 411), databases, information systems architecture, cloud computing, big data analytics, machine learning.

Currently Working Towards

- Full-stack depth: React, Node/Express, Docker, CI/CD and cloud deployment
- Adding AI-powered features to the apps I build
- Freelance and remote development work
